

# 8400 ONA DESK

DESIGN BY  
JORGE PENSI

A thoroughly modular table system, offering a wide range of finishing options for offices, for meeting and conference rooms, for seminar rooms and cafeterias. This series ranges from functional, stand-alone tables to top-quality conference configurations. These modular tables are available in a myriad of variations, spanning the entire spectrum of table top shapes, including ellipse, barrel, or bespoke table tops for custom configurations.

Jorge Pensi studied architecture in his home town of Buenos Aires. Since 1977, he lives in Barcelona and made a name for himself with his aluminium furniture designs. He used to be a visiting lecturer at the Art College in Stuttgart. His designs can be admired at many international exhibitions. The long list of design prizes underlines the importance of his works as a designer. Jorge Pensi's trademark style is reflected in his series for Kusch+Co.

# VARIATIONS

---

## 8400 SQUARE / RECTANGULAR TABLE

These tables are characterised by a distinct, modern design language, featuring a well-thought-out frame that offers plenty of legroom. The square tables are supported by cross pedestals, large-sized table tops are mounted on four-column cross pedestals. The rectangular table tops feature T-legs resp. double column pedestals.

---

## 8410 ROUND TABLE

The round variation of this multifunctional table series comes with six different table top sizes, always featuring cross pedestals. The first three "small" table tops are mounted on a central column, the three large table tops feature a four-column cross pedestal.

---

## 8474 ELLIPTIC TABLE

Elliptic tables have the advantage that participants can make eye contact, see each other, thus resulting in more efficient meetings. On top of this, the intelligent frame design provides plenty of legroom. Next to the three standard-issue sizes, this table top can be tailored to your requirements.

---

## 8475 BARREL TABLE

The barrel-shaped table top cleverly combines the straight sides of a rectangular table top with the "communicative" advantages of an elliptic table top. Next to the three standard-issue sizes, the barrel table top is available in a multitude of BTO sizes.

## ACCESSORIES

- Height adjustable plastic glides, black
- Height adjustable felt glides, black
- Height adjustable high-grade steel glides
- Height adjustable high-grade steel felt glides
- Modesty panels on long sides (for rectangular tables 8400/6)
- Modesty panels on short sides (for rectangular tables 8400/6)
- Linking elements table/table
- Linking elements table/linking top
- Power and data modules
- Centrally positioned power and data module
- Vertical cable duct attached to one column (not available for square and round tables)

# PRODUCT DATA

## 8400 ONA DESK TABLE CONFIGURATIONS

Apart from the stand-alone tables, table series 8400 Ona desk is available in a multitude of standard-issue table configurations for up to 24 persons. On top of this, individual table configurations with custom table top shapes for a number of persons of your choice are built to order. For more information, we refer to our datasheet "Table Configurations". Please contact us to receive your copy.

# MATERIALS, FINISHES

## 8400 ONA DESK

### FRAME

- Powder coated, bright chrome or satin chrome steel columns
- Powder coated, polished or bright chrome aluminium pedestals
- The size of the pedestals is dependent on the table top size
- Double column pedestals resp. four-column cross pedestals for large-sized table tops

# FIRE PREVENTION QUALITY, SUSTAINABILITY EXCERPT

## FIRE PREVENTION

Depending on the environment, contract seating has to be able to fulfil very specific requirements. Interior designers and planners sometimes have to clear difficult hurdles: such as exacting fire prevention regulations. Kusch+Co has worked out individual solutions:

### TABLE TOPS

Table tops with a 3-layered chipboard core, and featuring either a HPL or real wood veneer surface are also available in a flame retardant finish.

Please contact us to receive the test reports.

For more information, we refer to our brochure "Solutions" – please contact us to receive your copy.

## QUALITY

Our environmental and quality management systems are certified acc. to DIN EN ISO 14001 and to DIN EN ISO 9001. External audits as well as our in-house laboratory safeguard our quality level.

The tables of series 8400 Ona desk meet the requirements with regard to stability, static and dynamic load as well as strength and durability in compliance with the current European Directives, standards and regulations.

On top of this, we voluntarily test the strength of our table frames with an additional horizontal load test using higher weights and more test cycles.

All the power and data modules feature safety-tested components bearing the VDE mark. All tables with power and data modules meet the requirements of the European Directives, standards and regulations currently in effect. The components are all fitted, tested, labelled, and documented by skilled and trained personnel.

In our capacity as a DIN EN ISO 9001 certified company, we are authorised to test in our own laboratory whether our products meet the GS requirements for Tested Product Safety and issue a Declaration of Conformity equivalent to a GS sign.

We happily make these Declarations of Conformity as well as our brochure "Mission Statement Quality" providing detailed information on our test procedures available to you – please contact us.

## SUSTAINABILITY

Kusch+Co products stand for long life cycles and optimum recyclability. From the first design drafts of a new product, we take all environmental-relevant components and production processes into consideration, ranging from the materials selection and the design all the way to the manufacturing processes which also contribute towards our sustainable energy balance.

DQS-certified Environmental Product Declarations are available for all series, compiled conform to DIN EN ISO 14021 Type II, providing more information about all environmentally relevant aspects, including the Credit Points for the LEED certification of a building. Please contact us for more information.

**kusch.co**

**8400 ONA DESK**

ENVIRONMENTAL ASPECTS

**ENVIRONMENTAL RESPONSIBILITY**

Long before the production of a new series, Kusch+Co starts thinking about the possible environmental impact of the production process and the required components.

**SUSTAINABILITY**

Kusch+Co understands sustainability as the holistic, manageable and economically viable combination of environmental protection, social norms and CSR. Our aim is series of production, but also how we can contribute to our future with our staff members and partners. Sustainability cannot be measured, but it can be tested.

**QUALITY ASSURANCE**

In order to guarantee a constant high level of product quality, Kusch+Co is certified in accordance with the international management system DIN EN ISO 9001 and the environmental management system DIN EN ISO 14001. All other relevant standards are followed.

**LIFE CYCLE**

**1 MATERIALS**

- The models of series 8400 Ona desk are free from hazardous materials (lead, mercury, cadmium).
- All components of series 8400 Ona desk comply with the legal limit standards with the legal limit values.
- All spare parts are suitable for recycling.
- The used substances meet the criteria of emission class E1.
- All used products originate from sustainable, legal and verified sources.
- Series 8400 Ona desk contains no substances included in the Candidate List of the Restriction of Use of Substances (RoHS) No 1005/2009 (REACH).

**2 PRODUCTION**

**METAL COATING**

The powder coating is free from volatile organic compounds (VOC) and heavy metals and therefore physiologically harmless. Our components are produced in Germany and are physiologically harmless during the production and the service life of series 8400 Ona desk. We do not use performance-relevant PFPS for our components, as these substances are suspected of being carcinogenic.

**3 TRANSPORTATION**

The transportation energy is offset by the spacing energy before it is recycled.

**4 USAGE**

A long service life is guaranteed and most parts being interchangeable and reparable. That is our contribution to an efficient resource management.

**5 WASTE DISPOSAL**

At the end of their service life, the models of series 8400 Ona desk can be dismantled by our professional partners who will separate the materials correctly by type.

The models of series 8400 Ona desk are recyclable to approx. 97%. The recyclability is exclusive of adhesives, glues, oil, small parts and screws.

**WASTE MANAGEMENT**

All forms of process waste (shavings, scraps, metal labels) are collected by professional waste processing companies and 100% recycled. All used materials, resulting from end-of-life, are used to heat the factory, saving primary heating oil.
