

Light Air was created as an illusionist table lamp, a hanging light that defies the laws of gravity. It is minimalist, modern and rational, but at the same time has a magical effect. Its structure is a strong graphic statement composed of a rectangular frame formed by two pieces of transparent thermoplastic technopolymer containing a pleated fabric conical parabola in a variety of pastel colours. Sconce and hanging models are also available, in addition to the original.

# Light-Air Eugeni Quittlet 2015

Light-Air's good looks and features are evolving. In addition to sconce and hanging versions, Light-Air is also available in a table version with a rectangular transparent technopolymer or mass-dyed frame, containing a conical parabola with a diffuser sculpted in the same plastic material. The sculpted versions of the wall sconce and hanging versions are available in a variety of colours.
