

kartell loves the planet

GREENGUARD

PRODUCT CERTIFIED FOR
LOW CHEMICAL EMISSIONS
UL.COM/GG
UL 2818

Our passion for excellence, which has guided Kartell's every move from the onset, has led us to focus on **environmental responsibility** and pay attention to good practices in terms of **sustainability**.

Every day, we are directly and totally committed to laying the paving stones to build our business, making the history of our products, which are devised and designed to offer our customers a piece of great design.

A Kartell product is a timeless product, which is produced while **respecting the environment** and which is destined - on completion of its function - to occupy **museum spaces and join collectors' assets**.

Our vocation is to **create value**, and not just objects, but pieces that can contribute towards building a cultural project, not objects that risk being abandoned when no longer used, but instead become memorable pieces.

All the **raw materials** we use are **recyclable** and may be given a new lease on life thanks to material machining processes for industrial-use products.

Technological research and development, today just like seventy years ago, enable us to continue to find **materials that can be regenerated** and which have no negative impact on the environment.

Our commitment to implementing and continuing to improve the environmental management system is guaranteed by **compliance with international certification protocols.**

Our **products** are health-friendly, **certified GREENGUARD**, guaranteeing low emission levels and therefore safeguarding the quality of indoor air.

A large number of studies have demonstrated that a high concentration of pollution can be found in closed environments and is released by finishing materials. Every Kartell product has obtained certification to guarantee the low emission of pollutants, classifying them among products that are good for you.

All the **packaging** materials used for Kartell products are **100% recyclable.**

The entire production process supply chain involves our commitment to safeguarding the environment and observing sustainability protocols. Starting with our product packaging, using sustainable practices in every phase of production, and also involving the in-house company management.

Kartell loves the planet is the **industrial manifesto** with which Kartell intends to emphasise its commitment **to sustainability and environmental friendliness.**

LOUIS GHOST 2002
