COPENHAGEN

A New Form of Symmetry

Using the most elementary steel stock parts as their starting point, MSDS Studio has created an architectural little side table. Their design 'Stock' presents metal in a raw and deconstructed way, while retaining a delicate, rigid quality. The table's unconventional leg arrangement emphasizes the material's strength and produces an interesting composition of elements. The aesthetic negative spaces – the airy open area under the tabletop and the triangle between the angled legs – come from disregarding the traditional arrangement of table legs, creating a new form of symmetry. Stock appears as a small, strict piece of sculpture, which also serves as a practical, stable side table.

Product Facts

Description

Stock is a collection of small steel tables with an architectural expression. The graphic symmetry of the angled legs adds character to the simple design. Use the light but solid table as a side table in the living room, a nightstand in the bedroom or as a sculptural table in the hallway.

Designer / Year Of Design

MSDS Studio / 2018

Material

Powder coated steel or stainless steel

Construction

Stock is delivered assembled.

Maintenance

Clean with a damp cloth.

Please be aware that sharp objects can leave marks.
