

Maru

# Maru

---

Maru is made from 60 identical components that clip together to create an elliptical form. This is inspired by diatoms (continuing on from Navicula released in 2017) which are at the base of the entire oceanic food chain. Through photosynthesis, they liberate enough oxygen for our every second breath.

The swirling panels of sustainably managed bamboo plywood are arrayed around its form, lit internally by low energy LED modules. The effect of shadow play on surrounding walls and ceiling is Maru's hidden quality. The name Maru is found in both New Zealand Maori and Japanese languages, with references to the cycle of life.

Maru is available in 2 sizes, Small & Large. The plywood finish can be either raw bamboo or painted, offering a range of options.

# Features

---

## Shipped Kitset

Seed System kitset lightshades are on average 1/30th of the volume of the assembled light. This aims to help minimize the effects of shipping and to reduce the design's environmental footprint.

## Warranty

This light is warranted for three years from date of purchase for failure of parts.

## Care Instructions

All lights are intended for use in dry interior conditions only and can be cleaned with a soft cloth dampened slightly in warm water when the light is switched off. Do not use detergents.

## EPD Certified

An EPD is a standardised and verified way of quantifying the environmental impacts of a product, based on a consistent set of rules that have been developed through a stakeholder consultation process.

## Compliance

CE

AS/NZS

**(Declarations of conformity available on request).**

# Finishes

---

We offer 12 stock finish options for Maru. We use low VOC acrylic paint and it is most commonly used on the interior of the light. We can also produce lights in other finishes or colours by special order. All lights are made from sustainably grown bamboo plywood sourced from an FSC accredited factory.

# Installation

## You will need

Fixings for cone gripper and canopy  
(fixing screws NOT SUPPLIED).

Note: Choose appropriate hardware  
to attach base plate (Fig.1) to ceiling  
substrate.

Fig 1. Base Plate

Fig 2. Canopy

Step 1.  
Unscrew baseplate.

Step 2.  
Use appropriate fixing screw to  
mount base plate (Fig.1).

Step 3.  
Remove cable from cone. Screw cone back onto baseplate. Re-insert  
cable and level light. Once desired position is set, trim excess cable.
