## A Small Table that Reaches New Heights

Designer Simon Legald is the creator of the Turn table, a small yet functional table in wood and steel and now also marble. The collection has been expanded with two new variations with a tabletop in black marble and white marble.

This collection extension adds a touch of luxury and refinement to the design and the given setting with its sophisticated and timeless beauty. Marble is an extraordinary nature stone with wide pattern variation, making every Turn Table unique.

The name Turn refers to the rotational movement used to adjust the height of its round tabletop, gently raising it up from its bell-shaped steel base.

With a minimum height of 41.5 cm and a maximum height of 64 cm, this small table can be easily adjusted to suits its existing surroundings. Beyond acting as a visual ballast to the light tabletop, the distinctive base also serves as a stabilizing center of gravity and reflects the way in which Turn has been clearly designed around its function.

Turn is well-suited for use as a coffee or side table and can be placed on its own or in a group of small tables in a living room, lounge area, lobby, or hotel room. The ash veneer tabletop is lacquered in the same color as the steel base. The table comes in three monochrome tones of black, dark grey, warm grey and black and white marble, allowing Turn to blend in elegantly with different interior designs.
