

Fyr Stool

Designed by Yuchen Wu for Normann Copenhagen

Simple yet full of character

Normann Copenhagen's new Fyr Stool is designed with an emphasis on simplicity and quality. Meticulously crafted from solid pine, Fyr is a minimalist design infused with subtle details. Fyr's versatile design makes it ideal for numerous uses such as additional seating, as a side table, a display table or even a decorative sculpture.

The Fyr Stool is named after the Danish word for pine, emphasizing the material's unique character and durability. The combination of square and round elements creates a perfectly balanced design that exudes strength and elegance. Striving to create a stool that is both practical, simple and intriguing, designer Yuchen Wu explored numerous sketches before arriving at the final design. Of the design process, Yuchen says: "When designing something as simple as a stool, the challenge is to make it uncomplicated and practical, but still interesting. The result is a well-balanced combination of sturdiness, simplicity and detail, that at the same time allows the pine material to take center stage."

Fyr Stool is available in three versions: Natural pine, Dark Brown stained pine or Green stained pine, all finished with a clear UV lacquer. This finish not only protects the material's surface, but also minimizes any discoloration that may occur, ensuring that Fyr Stool will be a treasured piece for years to come.
