Decorative Quality Trivets Made of Oak

A classic shape with a pure expression. Timber is a stylish and practical trivet with a beautifully designed finish by Adam Goodrum. Timber trivets are made of natural materials and are useful both in the kitchen and for laying the table with.

Australian Adam Goodrum has used play as his reference point. With strong references to classic wooden toys, Timber is also playful in its shape and constitutes a graphic pattern through a pure and honest mode of expression. There are no unnecessary details.

Adam Goodrum explains: "My wish was to design a sculptural trivet. I adopted a playful approach to come up with the mode of expression. Just like a puzzle where the pieces must be fitted together correctly to create the whole picture. The trivet's three parts become one when they are connected together. The conical shaping constitutes an elegant gathering of the object."

Timber trivets are perfect for protecting the table from hot saucepans and dishes in a decorative way.
