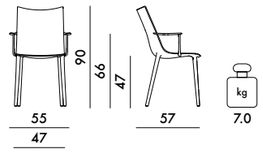
H.H.H. HER HIGHEST HIGHNESS **ECO-FRIENDLY TEXTURE** 2024
Design Philippe Starck

ADI COMPASSO D'ORO INTERNATIONAL AWARD

archiproducts AWARDS WINNER

NEW SUSTAINABLE MATERIAL

5918



STRUCTURE
Recycled thermoplastic technopolymer with mineral filler and glossy finish

SEAT
Recycled ABS and recycled soft polyurethane coated with "Eco-Friendly Texture" fabric

Eco-Friendly Texture

FRAME SEAT

LB White Tobacco

LN Black Black

Product made of recycled material

Made from recycled fabric

"Eco-Friendly Texture" fabric is a technically innovative covering material obtained partly from recycled material and partly from renewable sources. Available in black and tobacco.

Product made of recycled material

AVOTAN® A new, ecological, sustainable and circular tanning process. Italy is one of the world's largest producers of leather goods and the world's second largest producer of olive oil. Olive oil production generates oil vegetation water as a waste product. This waste product, however, contains substances that are highly valuable for the tanning industry: phenols and polyphenolic compounds with an effective antimicrobial and phytotoxic action, antioxidants and tanning agents. In this way, two food industry waste products can be used to create a valuable, long-lasting, ecologically sustainable and circular product. Unlike other vegetable tanning solutions, this Avotan uses no natural resources, does not contribute to deforestation, and uses existing waste that would otherwise have to be disposed of.
