

# Arita

by Neri&Hu

In 1616, porcelain stones were discovered at Izumayama mountain, which gave birth to Japan's very first porcelain. In the Edo era, many tableware artifacts belonging to Japanese feudal lords were made from Arita porcelain, manufactured in the northern part of Kyushu Island. After a research trip to Japan, Neri&Hu were inspired to reinterpret this historic manufacturing technique by using it in the production of the Arita collection for Stellar Works. The result is a contemporary dining collection with a 400 year old story behind it.

## Arita Vessels

The ceramic set of seven bowls and plates started as a project ensemble under. A Cabinet of Curiosity of seven objects to be displayed in the glass cabinet. Each ceramic piece is a different size with varying heights and volumes, blurring the typology of bowls and plates to respond to the contemporary lifestyle of full flexibility with distinction. Each vessel shape offers endless functional possibilities, yet any combination of them suggests a rebirth of a personalised table styling.

## Arita Liquid

These containers, inspired by Chinese traditional wine bottles, offer two sizes for cold or warm liquids. The cups can be stacked at the neck of the bottle to complete the visually interesting set, while the brass holder offers a graceful detail to the simple white shape.
